There are pros & cons to team sizes:
Smaller teams = more ice time for athletes but can cause team viability issues for games/practices if players are away due to illness, travel, etc. SPRA has an affiliation process in place to assist with team viability but affiliates are not always available.
Larger teams = improves team viability but may mean less ice time for athletes. Affiliates are less likely needed. Less pressure on players/parents to attend if athlete not well or families have other commitments. How many players per team is your preference?
 (players = skaters & goalies combined)

Answer Options	Response Percent	Response Count
11-12	49.0%	25
15-16	41.2%	21
Either is fine	9.8%	5
